The Wolf, the Sheep and the Cabbage

A **farmer** has just visited a local market and has bought a **wolf**, a **sheep**, and a **cabbage**. However, the shortest way home involves a **river crossing**, and the farmer has a very **small boat**, which can only carry the farmer and one of the purchases.

Only the farmer can row the boat.

If the farmer leaves the wolf alone with the sheep you can imagine what might happen. Similarly, the sheep would love to be left alone with the cabbage...

Can you help the farmer safely get everything across the river?
