Book #8

Fungi from Yuggoth

by H.P. Lovecraft (1930)

H.P. Lovecraft (1890-1937) was an american novelist who rose to fame posthumously thanks to his works of **horror fiction**. *Fungi from Yuggoth* is a fascinating **sonnet sequence** that marked the transition from a more traditional voice to his distinctively dark style, somewhat akin to **Edgar Allan Poe**'s. This sequence also triggered the plot for his later short story *Whisperer in the Darkness* (1931), where Yuggoth is turned into a planet of fungoid beings called **Mi-go**.
